Zac West – iOS Engineer

Zac West

July 21, 2025

Zac West

Location: San Francisco, CA
Website: zacwe.st

I put Apple frameworks through their paces.

Work Experience

Dec 2018 – Current

Dropbox
Staff Mobile Engineer

- Built a reusable theming module, refactored and rewrote almost every view in the app to support Dynamic Type and Dark Mode. - Overhauled accessibility support to meet WCAG 2.1 level AA standards. - Mentored engineers, improved developer tooling, evangelized RxSwift, and helped define internal processes.

Oct 2015 – Nov 2018

Imgur
Lead iOS Engineer
Picked up and fell in love with Swift. Architected and rewrote the app to be extensible and easy to build in. Managed the iOS team.

- Rewrote the iOS app in Swift to be modular and extensible.
- Managed the iOS team and led feature planning and architecture.
- Built reusable UI components, a feed system, and a background uploading system.

Free
Software Engineer
Feb 2015 – Sep 2015 - Rapidly iterated from beta to App Store release of a messaging app. - Developed custom UICollectionViews and Core Data networking layer.

Hey Inc.
Lead iOS Developer
Jan 2013 – Jan 2015 - First iOS engineer on Heyday, a journaling app that reached over a million downloads. - Built full-featured sync and backup system. - Contributed to all aspects of app design and engineering.
